Research Interests

I am interested in building human-supportive AI that learn from continuous experience to better understand users and act in dynamic, real-world environments. In particular, I hope to study:

- long-horizon reasoning and memory for embodied agents
- building and updating persistent knowledge from continuous multimodal streams
- wearable and egocentric AI that integrates diverse sensory signals to understand users and their context
- personalized agents that use long-term interaction history to infer user intent and adapt their behavior

Education

M.S., Computer Science/Artificial Intelligence, Yonsei University Mar 2024 – Aug 2026

- Data & Language Intelligence (DLI) Lab (advisor: Prof. Dongha Lee)

B.S., Computer Science, Yonsei University Mar 2019 – Feb 2024

Exchange Student, Computer Engineering, University of Vienna Feb 2022 – Jan 2023

Research Experience

KRAFTON AI, Seoul, South Korea Oct 2026 – Present

AI Research Intern

- Developing real-time vision-language-game action agents that perceive multimodal game observations and take context-aware actions for cooperative gameplay

CIPLab, Yonsei University, Seoul, South Korea Sep 2026 – Present

Visiting Researcher (advisor: Prof. Seon Joo Kim)

Naver Place, Seongnam, South Korea Aug 2025 – Jun 2026

- Advancing personalized place search and recommendation through user memory modeling
- Built a multimodal POI understanding framework that aligns place content with search intent

LinqAlpha, Massachusetts, USA Sep 2023 – Mar 2024

- Developed a retrieval-augmented LLM framework for automated fact verification under the guidance of Prof. Jy-yong Sohn

Publications

   ECCVW'26 Worshop on Embodied Multimodal Reasoning , 2026

2. Personalized Reward Modeling for Text-to-Image Generation
   Jeongeun Lee, Ryang Heo, Dongha Lee
   ECCV'26 | European Conference on Computer Vision

3. Offline Reasoning for Efficient Recommendation: LLM-Empowered Persona-Profiled Item Indexing
   Deogyong Kim*, Junseong Lee*, **Jeongeun Lee**, Changhoe Kim, Junguel Lee, Jungseok Lee, Dongha Lee
   arXiv preprint, 2025

4. Towards Personalized Conversational Sales Agents: Contextual User Profiling for Strategic Action
   Tongyoung Kim*, **Jeongeun Lee***, Soojin Yoon, Sunghwan Kim, Dongha Lee
   EMNLP'25 Findings | Findings of the Conference on Empirical Methods in Natural Language Processing

5. HIPPO-VIDEO: Simulating Watch Histories with Large Language Models for History-Driven Video Highlighting
   Jeongeun Lee, Youngjae Yu, Dongha Lee
   COLM'25 | Conference on Language Modeling

6. Towards Unified and Adaptive Cross-Domain Collaborative Filtering via Graph Signal Processing
   Jeongeun Lee, Seongku Kang, Won-Yong Shin, Jeongwhan Choi, Noseong Park, Dongha Lee
   arXiv preprint, 2024

7. Re-Ex: Revising after Explanation Reduces the Factual Errors in LLM Responses
   Juyeon Kim, **Jeongeun Lee***, Yoonho Chang*, Chanyeol Choi, Junseong Kim, Jy-yong Sohn
   ICLR'24 Workshop | Workshop on Reliable and Responsible Foundation Models

Teaching

- Teaching Assistant, [AIC2110] Introduction to Data Science (2024S, 2025S, 2026S), Yonsei University

Academic Services

Reviewer

- NeurIPS Main Conference: 2026
- NeurIPS VLM4RWD Workshop: 2026

Extracurricular Activities

YAI (Yonsei Artificial Intelligence) Jul 2021 – Jun 2024
President, Research Member

- A student-led AI study club that conducts collaborative learning and team projects, including solving applied tasks in partnership with industry.

Skills

- **Languages:** Korean (Native), English (Fluent)

Last updated: September 2026
